Prior Use

Present Use

Before a building can be demolished or removed, the owner or agent shall notify all utilities having service connections within the building, such as water, electric, gas, sewer, cable TV, and other connections between buildings. A permit to demolish or remove a building shall not be issued until it is ascertained that service connections and appurtenant equipment, such as meters and regulators, have been removed or sealed and plugged in a safe manner.

I certify that all of the following agencies/offices were sent their copy of the demolition/renovation notification and approval has been received.

Inspector may waive fee if structure is condemned.

See Sec. 520-9 attached.

§ 520-9 Razing buildings.

A.

No building within the Village of Stratford shall be razed without a permit from the Building Inspector. A snow fence or other approved barricade shall be provided as soon as any portion of the building is removed and shall remain during razing operations. After all razing operations have been completed, the foundation shall be filled at least one foot above the adjacent grade, the property raked clean, and all debris hauled away. Razing permits shall lapse and be void unless the work authorized thereby is commenced within six months from the date thereof or completed within 30 days from the date of commencement of said work. Any unfinished portion of work remaining beyond the required 30 days must have special approval from the Building Inspector.

B.

All debris must be hauled away at the end of each day for the work that was done on that day. Combustible material shall not be used for backfill but shall be hauled away. There shall not be any burning of materials on the site of the razed building. If any razing or removal operation under this section results in, or would likely result in, an excessive amount of dust particles in the air creating a nuisance in the vicinity thereof, the permittee shall take all necessary steps, by use of water spraying or other appropriate means, to eliminate such nuisance. The permittee shall take all necessary steps, prior to the razing of a building, through the employment of a qualified person in the field of pest control or by other appropriate means, to treat the building so as to prevent the spread and migration of rodents and insects therefrom during and after the razing operations.
